ABLE® SILICONE FOLEY CATHETER

Applications:

- Department of urology, anesthesia, ICU, department of general surgery, surgery, such as postoperative patients or patients that are unable to take care of themselves.

Features:

- It is made of imported medical grade silicone material.
- The silicone foley catheter has a larger inner lumen for better drainage than the same size one made from latex of PVC.
- No urate crystal and iritation occurs during intubation, thus catheter-associated urethral infection can be avoided.
- Silicone foley catheter is widely accepted because of better biocompatibility and indwelling period can be 30 days, which can reduce trauma to urethra caused by repeated intubation.
